17.06.21	6.20 -7.30pm

Cost: £95

* £85 Caspari Members

Location: Online

Only six places available

Certificate of attendance given to all participants.

These can can be used by therapists as part of their CPD evidence file.

Maria-Jose Lagos, clinical psychologist, will deliver the first of three seminars. She specialises in projective psychodiagnostics and is founding partner and research consultant for CEPI. Her work is framed within a psychoanalytically informed psychosocial research perspective.

Session 1-3

-Epistemological positioning of quantitative & qualitative research
-Review of main approaches to qualitative research - Implications for research in educational contexts
- Review of methods of data collection in qualitative research - Interpretive Phenomenological Analysis
- Brief discussion of a clinical vignette

Session 4

Dr. Roni Bor, child and adolescent psychotherapist, will share the research methods used in her doctoral research:

" Fight, Flight, Freeze, (For)give: What we hear when we listen to child psychotherapists talk about parents and parent work in the context of their daily practice."
